**Name** _____

- **Write as neatly as you can!**

- **No calculators are allowed.**

- **You must show your work to obtain full credit.**

1. (*5 points*) Suppose you own a rectangular plot of land, but you cannot recall its length and width. But you can remember following details:

   - the length is three times the width and

   - the perimeter is 80m.

   Find the length and the width.
   (Hint: the final answer should have an area of 300m^2.)

   w ⬚

   ℓ

2. (*5 points*) Find all values of x that satisfy the inequality

$$|3x - 6| + \frac{5}{2} \geq \frac{11}{2}$$

3. (*1 point, extra credit*) A laptop is priced at $1000 and the store announces a 10% discount. If you buy the laptop at the discounted price using a credit card that gives you 5% back, how much have you actually paid for the laptop?
